EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Young (reg. 43, 298) on 9/26/2006.

The application has been amended as follows:

The title has been changed to "Methods and systems for compiling and interpreting one or more associations between source language declarations and implementations in a language neutral fashion."

Per claim 1:

In line 8: "for the target runtime" has been corrected to --for a target runtime--

Per claim 47:

In line 1: after "embodied on" -- a—has been inserted.

These amendments were necessary in order to correct the non-compliance issue and to obviate any rejection under 35 U.S.C. 112 2nd.

Examiner's Statement of Reason(s) for Allowance

2. Claims 1-11, 28-33, 41-43, and 47 (renumbered as 1-21) are allowed.
3. The following is an examiner's statement of reasons for allowance:

The closest prior art of record, i.e. Alpern, taken alone or in combination, fails to teach or fairly suggests at least: determining whether a source language association rule...is different from a default association rule for a target runtime...providing the intermediate language representation of the association between the declaration and the implementation to the target runtime to compile the intermediate language representation into native code as recited in the independent claims 1, 28, 41, and 47.

While Alpern discloses an interface method table for a given class of objects and the conflict resolution routine pointed to by the IMT entry identifies at execution time the location of the particular interface method, ultimately, Alpern does not determine whether a source language association rule...is different from a default association rule for a target runtime...providing the intermediate language representation of the association between the declaration and the implementation to the target runtime to compile the intermediate language representation into native code.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
